

**Benefits of advanced alternative fuel technologies\* include:**

- Reduces Fuel Costs
- Increases Fuel Efficiency
  - Cleaner Emissions
  - Added Horsepower
- Reduces Engine Wear
- Increasing Engine Life
- Helps Reduce Overall Maintenance

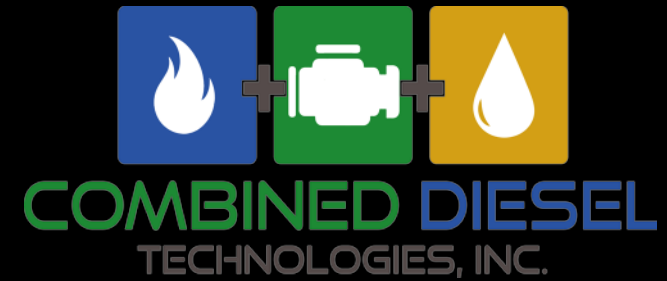

**Key features of this proprietary technology\* include:**

- Microprocessor Controller
- Self-Learn & Auto Calibration
- Auto System Leak Check
- Self-Diagnostic Alerts
- O.E.M Warranty Friendly
- Heavy Duty, Robust Design
- Real Time Fuel Reporting
- Performance Data Analytics

**CDT Inc.**

[cdt-inc.com](http://cdt-inc.com)

**Distributor\* of Industry  
 Leading Propane  
 Injected Diesel Technology**

**LOWER FUEL USE  
 HIGHER PROFITS**

[CDT-INC.COM](http://CDT-INC.COM)

## *Fuel Cost Savings*

- ± 20% reduction in diesel fuel consumption.
- ± 20% overall fuel cost savings.
- ± 20% increase in horsepower.

CDT Inc. distributes\* a computerized fuel blending technology that replaces a portion of the diesel fuel consumed by a diesel engine with propane, a clean burning, less expensive fuel.

## *Lower Emissions*

- Combustion temperature is reduced.
  - Reduction in NOX emissions.
    - A more complete burn.
  - Reduction in particulate emissions.
    - Less oil contaminates.
- Lower Peak Loads on internal components.\*

Green solutions are at the forefront of Federal, State and Local government initiatives. Emissions treatments and reduction processes are a natural outcome of the use of propane injection in the diesel engine.

## *Reduced Maintenance – Extended Life*

- Effective Oil life increased (70% less abrasive contaminates over the same miles).
- PM filter maintenance is reduced by 50-80%, and PM filter life extended by the same.
- PM filter maintenance intervals significantly extended.
- Extended engine life
- Quieter, cooler, smoother engine operation.
- OEM Warranty friendly

\*CDT is a distributor of AES technology ([www.americanenginesystems.com](http://www.americanenginesystems.com).)
